

## SAP Manufacturing Execution (ME) Deployment

Delivering ME basic **Track and Trace, Genealogy, Product Non-Conformance Handling and Reports**, straight out of the box with SAP's Manufacturing Execution Solution.

### What does this Solution offer?

- Provides a platform for managing and controlling manufacturing and shop floor operations using a single, centralized solution.
- Fosters the digital transformation journey, while delivering operational value to the bottom line.
- Delivers an “end to end”, feature rich MES platform for businesses running SAP ERP.

### Benefits:

- ✓ High resolution defect tracking
- ✓ Log, track and disposition of failed or defective parts
- ✓ Enables error-proof manufacturing
- ✓ Early detection of non-conformance products
- ✓ Reduction of scrap and rework

Whether automating real time data collection via connectivity to shop floor equipment or enforcing process rules and providing step by step operator instructions, SAP ME is the preferred platform to achieve operational excellence.

RTS offers this low cost, basic functionality out of the box deployment to get the journey started.

### Deployment time: 20 weeks + UAT
